

How do I dispose of...

Below is a list of common items and how to properly dispose of them, in alphabetical order to make it easier to find the item you're looking for!

Accuracy. Both the City and Waste Control do their best to review and keep current all of the information found on this page as well as the recycling website itself. While updating these sources is relatively quick and easy to do, those changes may not appear in our printed material, such as the recycling brochure, until the existing supply runs out and a new order is made.

Composting. At this time, the City does not have a yard waste program. Contact the Cowlitz County Public Works Department (360-577-3126) to see if composting units are in stock to purchase (\$10) to set up composting at your residence. If you do not have an area for composting, those items noted below in the blue composting column should be discarded in your green garbage container.

If you have questions about an item or would like to add to the list, please use the Feedback form and let us hear from you! This list is updated quarterly with your suggestions.

ITEM	R E C Y C L E	C O M P O S T	G A R B A G E	O T H E R	COMMENTS / ALTERNATIVE OPTIONS
